Carbon Insights

Calculation of all greenhouse gas (GHG) emissions from your buildings and custom recommendations for reductions.

- Calculation standard: ISO 14064-1:2018
- Scopes measured:
 - scope 1 (direct emissions),
 - scope 2 (indirect emissions)
 - scope 3 (other indirect)
- Emission sources: energy, product, waste, transport

May be eligible for up to 75% of Ecoleader funding in Quebec.

JOINING SUSTAINABLE COMMUNITY

No out of pocket fees
nor risks

GHG Reductions & Financing

We quantify emission reductions and convert them into VERRA verified carbon credits.

80%

We return 80% of the sales of our members' carbon credits:

- 45% in cash
- 35% in unbilled services

We can recommend up to 15 generic reduction project types (energy conversion, methane avoidance, energy efficiency...)

Be part of a unique community in Canada.

BUYING CARBON CREDITS

global demand up
since 2019

Carbon Neutrality

Offset your incompressible emissions to achieve carbon neutrality.

100% Canadian carbon credits, certified by the world's largest voluntary carbon market, Verra's VCS.

Credits are generated from micro-projects that reduce GHGs at source, supporting Canadian companies.

Co-benefits on 6 of the 17 United Nations Sustainable Development Goals.
