

# Verified Carbon Credit Inventory

Latest update : 16 February 2026

---

**Project Name** Energy Efficiency and Solid Waste Diversion Activities within the Quebec Sustainable Community (ID 929)

**Project Owner** Will Solutions Inc.

**Trade Name** Quebec Sustainable Community (QSC)

**Program:** [VCS Program](#)

**Methodology:** [VM0018 developed and certified under the VCS program](#)

**Period:** 01 January 2010 to 31 December 2019

**Renouvellement:** The CDQ renewed its validation for a second 10-year period under the VCS program in May 2021. This second period covers January 1, 2020, to December 31, 2029.

**Documentation:** All project documents are available on the Verra registry or on the WILL registry.

---

## Notes on the serialisation of WILL's carbon credits:

As of the 4th cohort, WILL quantifies the GHG reductions of micro-projects eligible for its Sustainable Community retroactively over 5 years, with reference to the last verification cohort. These reductions will be serialized under WILL. The same will apply to the GHG reductions associated with energy conversions projects as of January 1, 2015.

**Serialisation** Digital identification allowing the association of a single and unique ton of CO2 equivalent (tCO2e), quantified and verified, in 1 single carbon credit and thus ensure the avoidance of double accounting.

**VCS Serialisation** Unique digital identification provided by the VCS program (for each ton of quantified and verified reduction) and maintained by VCS. These verified reductions are called VCU.

**WILL Serialisation** Unique digital identification emitted by WILL and maintained by WILL for all GHG reductions (quantified and verified); not serialised by the VCS program. These verified reductions are called WCU.

1st period - 2010-2019
